1 OVERVIEW

The workshop track of the Web Conference 2023 organized 20 workshops (12 full-day workshops, 8 half-day workshops) in Austin, Texas, United States. The workshop track hosted organizers from 82 unique institutions (56 of which are universities) located in 20 countries, as can be seen in Figure 1. The workshop program consisted of a mixture of both new and established workshops, with 7 workshops being organized for the first time.

Following the successful approach of previous years, the workshop programs consisted of a combination of (long) research papers, (short) vision, work-in-progress and/or demo papers, keynote speakers, and panel & community discussions. In total 118 papers were accepted across all workshops.

The 10 workshops organized on the 30th of April were:

- Fourth International Workshop on Cyber Social Threats (CySoc 2023)
- First Workshop on Machine Learning for Streaming Media (ML4SM 2023)
- First Workshop on Decision Making for Information Retrieval and Recommender Systems (DM4IR&RecSys 2023)
- Third Workshop on Financial Technology on the Web (FinWeb 2023)
- Eleventh International Workshop on Natural Language Processing for Social Media (SocialNLP 2023)
- First International Workshop on Semantics in Dataspaces (SDS 2023)
- Third International Workshop on Scientific Knowledge Representation, Discovery, and Assessment (Sci-K)
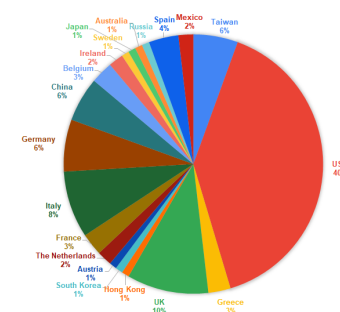

Figure 1: Division across countries of the host institutions of the workshop organizers

- First Workshop on Federated Learning Technologies (FLW 2023)
- Ninth International Smart City Workshop – The Web and Smart Cities (WebAndTheCity 2023)
- Beyond Facts: Third International Workshop on Knowledge Graphs for Online Discourse Analysis (BeyondFacts 2023)

The 10 workshops hosted on the 1st of May 2023 were:

- Second Workshop on Interactive and Scalable Information Retrieval Methods for eCommerce (ISIR-eCom 2023)
- Second Workshop on Personalization and Recommendations in Search (PaRiS 2023)
- Thirteenth Temporal Web Analytics Workshop (TempWeb 2023)
- First International Workshop on Digital Twins for Smart Health
- Third International Workshop on Deep Learning for the Web of Things (DLWoT 2023)
- Second International Workshop on Cryptoasset Analytics (CAAW 2023)
- First International Workshop on Natural Language Processing for Knowledge Graph Construction (NLP4KGC 2023)
- Second International Workshop on Multisensory Data and Knowledge (MDK 2023)
- Second Workshop on Trusting Decentralised Knowledge Graphs and Web Data (TrusDeKW 2023)
- First International Workshop on Knowledge Graphs for Sustainability (KG4S 2023)

2 PROCEEDINGS ORGANIZATION

The companion proceedings includes for each workshop a short foreword by the organizers, outlining the vision and scope, followed by the accepted papers, both long and short, of that workshop.
